

BIG BALE MULCHER

BBM3X4 Skid Steer Mounted Straw Blower

The newly redesigned Big Bale Mulcher for Skid Steers is available in two models to accommodate processing both 3'x3' and 3'x4' size bales. Improvements include the top section of the bale holder folds down for easy transport, the feed rollers deliver more consistent, jam free material, and we have added a radio control device for easy operation with most skid steers.

The mulching crew is now downsized to ONE MAN who is proficient at operating a skid steer. The Big Bale Mulcher for Skid Steers will discharge mulch up to 40 feet in still air through a fixed discharge chute or an optional operator controlled discharge chute. The BBM3X3 is designed for skid steers with a minimum hydraulic flow rate of 22 gpm while the BBM3X4 requires a high flow hydraulic system with at least 28 gpm. The attachment plate is universal and will fit most skid steer models.

The Big Bale Mulcher for Skid Steers is compatible with most skid steers currently on the market. If you have questions about the compatibility of your skid steer please call or email us today.

Compatible Bale Size:	3'x4'x8'
Skid Steer Requirements:	7,000 lb minimum operating weight, 28 GPM high flow hydraulics
Controls:	+12 volts from skid steer needed to operate hand held wireless remote control
Capacity:	Up to 2 tons per hour
Blower:	20" diameter x 7" wide
Range:	Up to 40 ft (12.2 m)
Feeding System:	Gravity fed into two speed adjustable feed rollers. Feed rollers force mulching material into beater/fan shaft. Feeding system automatically stalls when beater shaft is overfed.
Beater Bar:	Two 8' long, 24" diameter, dual plane dynamically balanced beater bars, hydraulically driven by two motors at 200 rpm.
Discharge Control:	Up and down controlled by angle of unit, left and right controlled by wireless remote control
Weight:	1,350 lbs (612.35 kg)
